

L6602 Intelligent high level Touch Keypad office/apartment fingerprint lock with full metal surface casting

Features:

1. zinc alloy materials, one piece panel design, sturdy and durable with OLED display screen.
2. High identification fingerprint recognition speed, 1 second!
3. Voice prompt, convenient
4. Fingerprint + Password + Mechanical key + MF cards
5. 4pcs AA alkaline battery, 10 months long
6. Low battery warning
7. Special PCB treatment
8. Standard 5 latches lock body
9. Passed the 100000 opening times test

Specification:

- panel and handle material: zinc alloy
- Colors: red bronze/ golden
- User Quantity: more than 250 users, adjustable!
- Mortise/cylinder: ANSI or EU standard or fire-proof mortise
- Verify mode: Fingerprint + Password + Mechanical key+ MF cards
- Working voltage: 4 pcs AA alkaline battery,
- Suitable door thickness: 40mm-60mm available for others
- Static current: < 15 μ A
- Dynamic current: < 30 μ A
- Low voltage warning: < 4.8V, 250 times at least
- Working temperature: -10°C-60°C
- Working humidity: 0%-95%
- Weight: 5kgs

Reliability

Special PCB board treatment, added anti-oxygen glue, dustproof, water proof, not easy aging
High security lock body
Standard 5 latches lock body
Latches operation maximum 2,000,000 times, American ANSI standard, CE certificate, MA test report and EU
Highest standard CE certificate
High security cylinder
Passed the 100000 opening times test
